Terms and Conditions

Payment

Payment must be made with order by bank transfer or cheque to Dragon Design, at its UK account with Lloyds Bank Plc
Account no. 01145275
Sort code 30 90 02

Quality of manufacture

Every effort will be made to ensure the materials and products are of a high standard before dispatch. However, if you find any irregularities with the quality on arrival, please inform us immediately and we can organise a replacement, free of charge.

Accuracy of fit

We are replicating woodwork and joinery for boats made from 1967 onwards. These boats were built primarily by Honnor Marine of Totnes, Devon and were not made in an automated or standardised process. Therefore it is common for the position of fixing holes to differ between boats, sometimes by a significant amount. So, please be prepared to drill new fitting holes, or provide us with a drilling template, or an existing part to work from. If in doubt, just call Phil Osborne for advice. We are here to help with any installation issues.

Custom pieces

If you have a one-off piece to be made, not in our standard range, then we will make this to **your** pattern or original piece. We will make every effort before the manufacture process starts to ensure these details are correct and fit for your complete satisfaction, but it relies on the provision of accurate information to start with.
